

SIMCORP CORIC

HOSTING & MANAGED SERVICES SOLUTION

Let SimCorp Coric take care of your system infrastructure, letting you focus on delivering superior client experience.

 SimCorp Coric

INTRODUCING THE SIMCORP CORIC **HOSTING & MANAGED SERVICES** SOLUTION

Delivering asset and wealth managers world-class client communications and reporting as a cost-effective and agile hosted solution.

The SimCorp Coric Hosting & Managed Services solution delivers a world-class end-to-end client reporting and communications suite as a hosted solution via the Microsoft Azure private cloud platform.

The service comprises of three core components:
 1) Infrastructure as a Service (IaaS) via Microsoft Azure
 2) Security Operations Center (SoC) 3) Coric Managed Services.

These components provide asset and wealth managers with versatility, total security and a low total cost of ownership.

1 INFRASTRUCTURE AS A SERVICE (IAAS) VIA MICROSOFT AZURE
 The solution combines a market-leading client communications and reporting solution with a world-class hosting and IaaS.

Features:

- World-class Infrastructure as a Service hosted on Microsoft Azure
- Three dedicated client environments - Development, UAT and Production
- Microsoft Azure global data centers including locations in Europe and North America
- Geo replication: ensuring data is backed up and replicated to ensure robust disaster recovery

SECURITY OPERATIONS CENTER (SOC)

With cloud security top of mind for all financial institutions, SimCorp Coric’s Hosting & Managed Services delivers peace of mind through the provision of robust and comprehensive security features.

Features:

- Intrusion detection system: Using Security Information and Event Management (SIEM) the SoC can detect and mitigate any security incidents as they occur.
- File integrity management: Monitoring of key files for unexpected changes
- Enterprise firewall: Enterprise-class perimeter firewall, including WAF functionality if required
- Vulnerability scanning: Regular scanning of system to identify internal and external attack vectors
